Massage Therapy for Individuals with Cancer or Survivors

It helps with circulation and restores energy. It reduces pain and minimizes the effects of radiation and chemotherapy treatments. It enhances a patient's body awareness and allows them to direct energy toward healing. Massage therapy is becoming an important arrow in the quiver of those treating cancer patients.

Hardy County Cancer Coalition

MISSION:

To improve cancer survivorship and quality of life in Hardy County by uniting organizations and empowering people with information and resources.

VISION:

To reduce the burden of cancer in Hardy County through prevention, education, and advocacy.

GOALS:

Hardy County with input from diverse community groups, approaches cancer control by addressing cancer prevention, early detection, and quality of life through survivorship and palliative care. In considering these categories, the Hardy County Cancer Plan has set five broad goals:

1. Reduce the risk for developing cancer
2. Increase early detection and

3. Address quality of life issues for Hardy County affected by cancer
4. Promote the collection and use of cancer-related data
5. Improve the coordination and collaboration between cancer control efforts

VALUES:

Hardy County values a process that encourages broad collaborative participation and is:

- Prevention-oriented
 - Science-based
 - Data-driven
 - Culturally competent
 - Survivor-informed
 - Outcome-oriented
- Comprehensive in nature
